

POST OPERATIVE INSTRUCTIONS FOR THE SEDATION PATIENT

Patients may sleep, but must be watched for at least 6 hours after treatment.

Please escort the patient from the vehicle to the house by supporting them under the arm. Do not let the patient go up or down stairs unescorted. Do not drive and limit physical activity for the remainder of the day. Give the patient medications if directed by your dentist.

Being cold is normal. Use blankets as needed.

Leave the post-operative instruction sheet and medication out for patient to find easily.

If the patient experiences any complication call our Office at (480)-857-9009

RELEASE

I am escorting _____ home. I understand the patient has been sedated. I have received a copy of the post operative instructions for the sedated patient. I agree to follow the instructions. I have had an opportunity to ask any question I may have.
